

Lecture series "Current Topics in Protein Science" Fridays 13:00-14:30 ND 04/397

Date	Lecturer	Subject
11.04.2025	Eckhard Hofmann	Structural Enzymology: Unravelling Protein Function from a Protein
18.04.2025	Good Friday	Holiday
25.04.2025	Frederik Großerüschkamp	Label-free infrared imaging for cancer diagnostics and prognostics
02.05.2025	Till Rudack	Calculating the Secrets of Life: Structure, Dynamics, and Function of Vital Molecular Machines
09.05.2025	Katalin Barkovits	A look behind the scenes: proteomics in medical research
16.05.2025	Raphael Stoll	Biomolecular NMR on medically-relevant proteins
23.05.2025	Carsten Kötting	Chemical tools for studying proteins using IR spectroscopy
30.05.2025		
06.06.2025	Jörn Güldenhaupt	ATR-IR spectroscopy for monitoring protein structural states and changes
13.06.2025		Pentecost
20.06.2025		
27.06.2025	Sacha Baginsky	Plant proteomics
04.07.2025	Franz Narberhaus	Building the Gram-negative cell envelope: How to cross three layers
11.07.2025	Dirk Tischler	Functional annotation of biocatalysts
18.07.2025		Biology faculty party
